ALUMINIUM LUGS ALUMINIUM CRIMPING LUGS CABLE LUGS

Conex is a pioneer in Manufacturing and Supplying of **Aluminium Lugs Aluminium cable lugs Crimping Aluminium lugs** as per international standards. The Purity of aluminum used in designing the Aluminium Lugs is high quality EC grade, i.e. purity more than 99.6%. We offer the Aluminium Lugs at competitive prices to the esteemed clients across the world. Our primary markets are Europe, USA, Australia and Canada.

Key Aluminium Lug Features :

- High conductivity of current
- Keep temperature rise within specified limits of is 5561-1970
- Sufficient thickness to carry required rated current
- Perfectly marked Conductor size and hole size
- Capable of carrying over current
- Soft tube makes it easier to crimp
- Homogeneity of jointing material and the cable so as to avoid sparking
- Dimensional sizes ensuring the current density is sufficiently low to reduce substantially
- Well sealed packaging

Supplied To :

Electricity distribution companies
Manufacturers of panel boards
Electrical Transformers
Electrical contractors
importers and distributors

ADDRESS:

CONEX ALUMINIUM COMPONENTS

Plot 12, GIDC Ind estate
Udyognagar
Jamnagar 361005 Gujarat
